Summary

AI/ML undergraduate skilled in Python, FastAPI, React, and LLMs (Google Gemini, Groq), with hands-on experience building and deploying full-stack AI applications including chatbots, RAG pipelines, and recommendation systems. Seeking to apply ML and full-stack development skills to build scalable, real-world AI products.

Education

Alva's Institute of Engineering and Technology **2023 – Present**
B.E. in Artificial Intelligence and Machine Learning *Mijar, Karnataka*

Amara Jyothi Pre-University College **2022 – 2023**
Pre-University Course – PCMB *Sullia, Karnataka*

Rotary English Medium High School **2020 – 2021**
SSLC (Secondary School Leaving Certificate) *Sullia, Karnataka*

Projects

AI Mock Interview Platform | *JavaScript, Google Gemini API, Vapi AI, Firebase, Vercel* **Dec 2025**
- Engineered a full-stack AI mock-interview web application that integrates the Google Gemini API to dynamically generate role-specific interview questions and evaluate candidate responses in real time.
- Implemented voice-based conversational interaction using Vapi AI, simulating live interview scenarios to help users practice under realistic conditions.
- Configured Firebase for authentication and backend data storage, and deployed the application on Vercel, enabling fast, scalable, zero-downtime hosting.

CarrierAI – AI Career Assistance Platform | *FastAPI, React, PostgreSQL, LangChain, Qdrant, Groq LLM* **Feb 2026**
- Built a full-stack career-guidance platform with a FastAPI backend and React frontend that parses uploaded resumes/CVs and generates personalized, skill-based feedback.
- Designed a job-recommendation engine that matches candidate skills and resume content to suitable roles using LangChain and Qdrant vector search over a Groq-hosted LLM.
- Developed a conversational AI chatbot enabling users to query which roles best fit their profile and receive tailored, context-aware career suggestions.

KisanAI – Smart Agriculture Assistant | *FastAPI, Satellite Imagery, AI Chatbot, NLP* **Aug 2026**
- Developed a FastAPI-based system to detect crop diseases from images and recommend suitable crops using satellite imagery analysis of soil health.
- Built a multilingual AI chatbot supporting regional languages to improve accessibility for farmers with limited English proficiency.

Technical Skills

Languages: Python, SQL, HTML, CSS
Frameworks & Libraries: FastAPI, React.js, LangChain
AI/ML & Data: LLMs, RAG Pipelines, Google Gemini API, Groq LLM, Qdrant (Vector DB), Data Analysis
Tools & Platforms: Git, GitHub, MS Excel, MS PowerPoint, MS Wod, Goodle Sheets, Firebase, PostgreSQL, Vercel, Render, Linux, VS Code, WebStorm
Core Competencies: Analytical Thinking, Debugging, Problem Solving, Team Collaboration, Communication

Certifications

- **Python Developer Certification** – freeCodeCamp
- **Google Cloud Data Analytics** – Google Cloud Career Launchpad
- **Artificial Intelligence** – Infosys Springboard
- **National-Level Idea Pitching Contest – Ideathon 2025** – Bangalore Institute of Technology

Achievements & Extracurricular

- Competed in a Hackathon hosted by AIET in association with Avinya Techknows, Bangalore, building a working prototype under time constraints.
- Presented at Ideathon 2025, a National-Level Idea Pitching Contest at Bangalore Institute of Technology (September 2025).
- Volunteered as a Python instructor for Python Prayana, a 15-day AIET outreach program across 8 local schools.
